

equally indebted to Dr. NJI Jones for his efforts and support in proofreading this document.

So many thanks to my data collectors, who relentlessly trekked and worked under the heavy rains to collect data. Without you, this work would not have been possible. I am also indebted to all respondents who voluntarily contributed to the study; without them the study would not have been possible. Thank you.

Sincere thanks equally go to the 11 PMTCT service providers with whom I had the Focus Group Discussion. My gratitude equally goes to my brothers and sisters, whose prayers and support encouraged me to carry out this study. I am very proud of you all. And to the wonderful staff of the Department of Public Health and Hygiene, I say thank you for grounding us with the concepts. I am indeed grateful to you all.
